

Presentation Skills for Engineering Students

Course number:	8228
Hours per week:	2
ECTS:	2
Scheduled:	Summer Term and Winter Term
Format:	Interactive lecture
Examination:	Oral presentation
Lecturer:	Prof. Dr. Sylvana Krauß
Objectives:	This course is designed for students aiming to enhance their English language proficiency in the context of technical presentations. Throughout the course, students will acquire a comprehensive understanding of presentation strategies and aim at mastering the essential phrases typical for presentations. Emphasis will be placed on developing the ability to present specialized information with clarity and impact.
Contents:	Students will engage in practical sessions to apply presentation techniques in English, focusing on key aspects such as body language, visualization techniques, handling questions, and the nuanced differences between written and spoken language.
Pre-requisites	none
Recommended Reading:	Online material in Moodle course
