

SAP S/4HANA - Integration of Business Processes

Course number:	new
Hours per week:	4
ECTS:	5
Scheduled:	Summer semester
Format:	Six one-day lectures 8 a.m. – 6 p.m.
Examination:	Written Exam (90 min.)
Lecturer:	Ernst Schulten
Objectives:	Students will learn how the fundamental integrative business processes of a company interact with the SAP® S/4HANA application. The course provides participants with a broad base of knowledge about core business processes, business contexts and the integration of business processes in SAP S/4HANA. You will be able to work in SAP via GUI and/or Fiori. A comprehensive SAP case study will also guide the students through the processes. The course brings together all the subjects taught to a business student in one course and shows business administration in a living system. In this respect, the knowledge acquired can be used in the further course of studies. In addition, students have the opportunity to take an official SAP certification exam to have their know-how certified by an external source.
Contents:	• Managing Clean Core • Solutions for the Intelligent & Sustainable Enterprise • Central Concepts & Fiori • External & Internal Accounting, Embedded Analytics (Record-to-Report) • Purchasing (Source-to-Pay) • Production Planning and Control (Design-to-Operate) • Sales (Lead-to-Cash) • Service • Human Experience Management (Recruit-to-Retire) • Enterprise Asset Management • Project Management
